Many people died on 9/11. Two airplanes crashed into the Twin Towers. When the airplanes hit, smoke started coming out the towers. The news teams came, and they started seeing people jump out of the windows of the buildings. It was sad seeing people risk their lives to help people survive. A third airplane hit the Pentagon in Virginia. A fourth airplane crashed in a field in Pennsylvania. 9/11 is an event that will never be forgotten because it was something really horrible. Almost 3,000 people died in just two hours. Some people had to make a choice on how to die. Many people decided to jump out of the Twin Towers instead of being burned alive. I can't imagine the feelings of those families who lost loved ones in that horrible event. People cried because of what was happening. I hope this never happens to me or anyone else because this is something that no one would like to experience.
