What is gun violence?

Gun violence defined literally means the use of a firearm to threaten or inflict violence or harm. Gun violence may be broadly defined as a category of violence and crime committed with the use of a firearm; it may or may not include actions ruled as self-defense.

WHICH OF THESE SIGNS WILL PREVENT ANOTHER TRAGEDY?

What causes gun violence?

Simple uncontrolled anger is the cause of gun crimes. Thus far every case of people going off on a rampage shows significant signs of depression and other issues. Laws will never stop criminals. Criminals break laws. There are tons of reasons why people do it such mental disturbances, desperation, anger; the list goes on and on. But also a major cause for gun violence is access to guns. Dangerous people get their hands on them illegally and gun violence erupts. I find that odd because in some other countries there's a gun in almost every home, yet the number of murders that happen a year are by far less than that of the US. The most possible answer why people kill is because they were bullied or are very angry.

How do we stop gun violence?

To help stop gun violence tell the kids about the safety measures that should be taken so as to avoid gun violence. It is necessary to have cameras in school. Also building up strong fences around the school will be a good step to avoid gun violence another thing that something we can do is to tell an adult about bullying because the one getting bullied can come back for revenge so report bullying. Another thing is to watch children for strange behavior problems. Parents should be more cautious about what their offspring is doing and have more discussions with them and also hire police officers.
